- 20----- Heloderma suspectum
- 5----- Gerrhonotus kingii
- 186----- Cnemidophorus gularis
- 159----- Cnemidophorus melanostethus
- 73----- Cnemidophorus tigris
 - Cnemidophorus arizonae
 - Eumeces obselatus
 - Eumeces guttulatus Ft. Verde
 - Sceloporus elongatus
 - Leptotyphlops dulcis
- 4----- Siagonodon humilis
- 1----- Lichanura roseofusca
- 5----- Chilomeniscus cinctus
- 1----- Sonora semianulata
 - Sonora episcopa
- 2----- Sonora occipitalis
 - Gyalopium canum
- 5----- Rhinocheilus lecontei
- 6----- Salvadora grahamiae
 - Phyllorhynchus brownii
- 4----- Hypsiglena ochrorhynchus
- 1----- Diadophis regalis
- 3----- Lampropeltis pyrrhomelaena
- 1----- Lampropeltis boylii
 - Lampropeltis splendida
 - Lampropeltis conjuncta
- 4----- Bascanion f. frenatum
- 2----- Bascanion piceum
- 4----- Bascanion semilineatum
- 1----- Bascanion taeniatus
- 1----- Arizona elegans
- 7----- Pituophis c. deserticola
- 1----- Thamnophis vagrans
- 21----- Thamnophis eques
- 4----- Thamnophis marcianus
- 6----- Thamnophis megalops
- 18----- Thamnophis angustirostris
- 1----- Trimorphodon lyrophanes
- 12----- Tantilla nigriceps

- ° Ambystoma tigrinum
- 43---- Hyla arenicolor
- 21---- Bufo woodhousii
- 5---- Bufo punctatus
- 31---- Bufo alvarius
- 46---- Bufo cognatus
- 8---- Scaphiopus couchii
- ° Scaphiopus hammondii
- ° Bufo compactilis Phoenix
- ° Chorophilus Flagstaff
- 130 Rana pipiens
- 20---- Kinosternon sonoriense
- 8---- Terrapene ornata
- 6---- Gopherus agassizii
- 50---- Coleonyx variegatus
- 70---- Dipsosaurus dorsalis
- 1---- Sauromalus ater
- 9---- Crotaphytus c.baileyi
- 9---- Crotaphytus wislizenii
- 1---- Uma notata
- 27---- Holbrookia m.approximans
- 45---- Holbrookia texana
- 387---- Callisaurus ventralis
- 98---- Uta stansburiana
- 360---- Uta ornata
- 8---- Uta graciosa
- 143---- Sceloporus jarrovii
- 19---- Sceloporus magister
- 53---- Sceloporus consobrinus
- ° Sceloporus scalaris
- 42---- Phrynosoma hernandesi
- 23---- Phrynosoma solare
- 2---- Phrynosoma platyrhinos
- 3---- Phrynosoma m'callii
- ° Phrynosoma cornutum
- ° Phrynosoma modestum

- 1-----Tantilla wilcoxi
- 4-----Elaps euryxanthus
- ° Sistrurus catenatus edwardsii
- 7-----Crotalus molossus
- 16-----Crotalus atrox
- 1-----Crotalus tigris
- 1-----Crotalus confluentus
- 2-----Crotalus oregonus
- 5-----Crotalus cerastes
- 2-----Crotalus mitchellii
- 1-----Crotalus lepidus
- 1 Crotalus pricei
- ° Crotalus willardi

- Elaphe glarosoma
- Leptotyphlops dulcis
- Sonora episcopa
- Gyalopium canum
- Phyllorhynchus brownii
- Lampropeltis splendida
- Lampropeltis conjuncta
- Sistrurus c.edwardsii
- ✓ Crotalus willardi
- Phyllorhynchus decurtatus
- ✓ Eumeces obseletus
- ✓ Eumeces guttulatus
- Sceloporus elongatus
- ✓ Sceloporus scalaris
- Phrynosoma modestum
- Phrynosoma cornutum
- Chorophilus
- Bufo compactilis
- Scaphiopus hammondii
- ✓ Heterodon

Adjustable to fit any size of shot-gun shell. By pressing together, the clutches spread apart and when released take a firm hold on the shell.

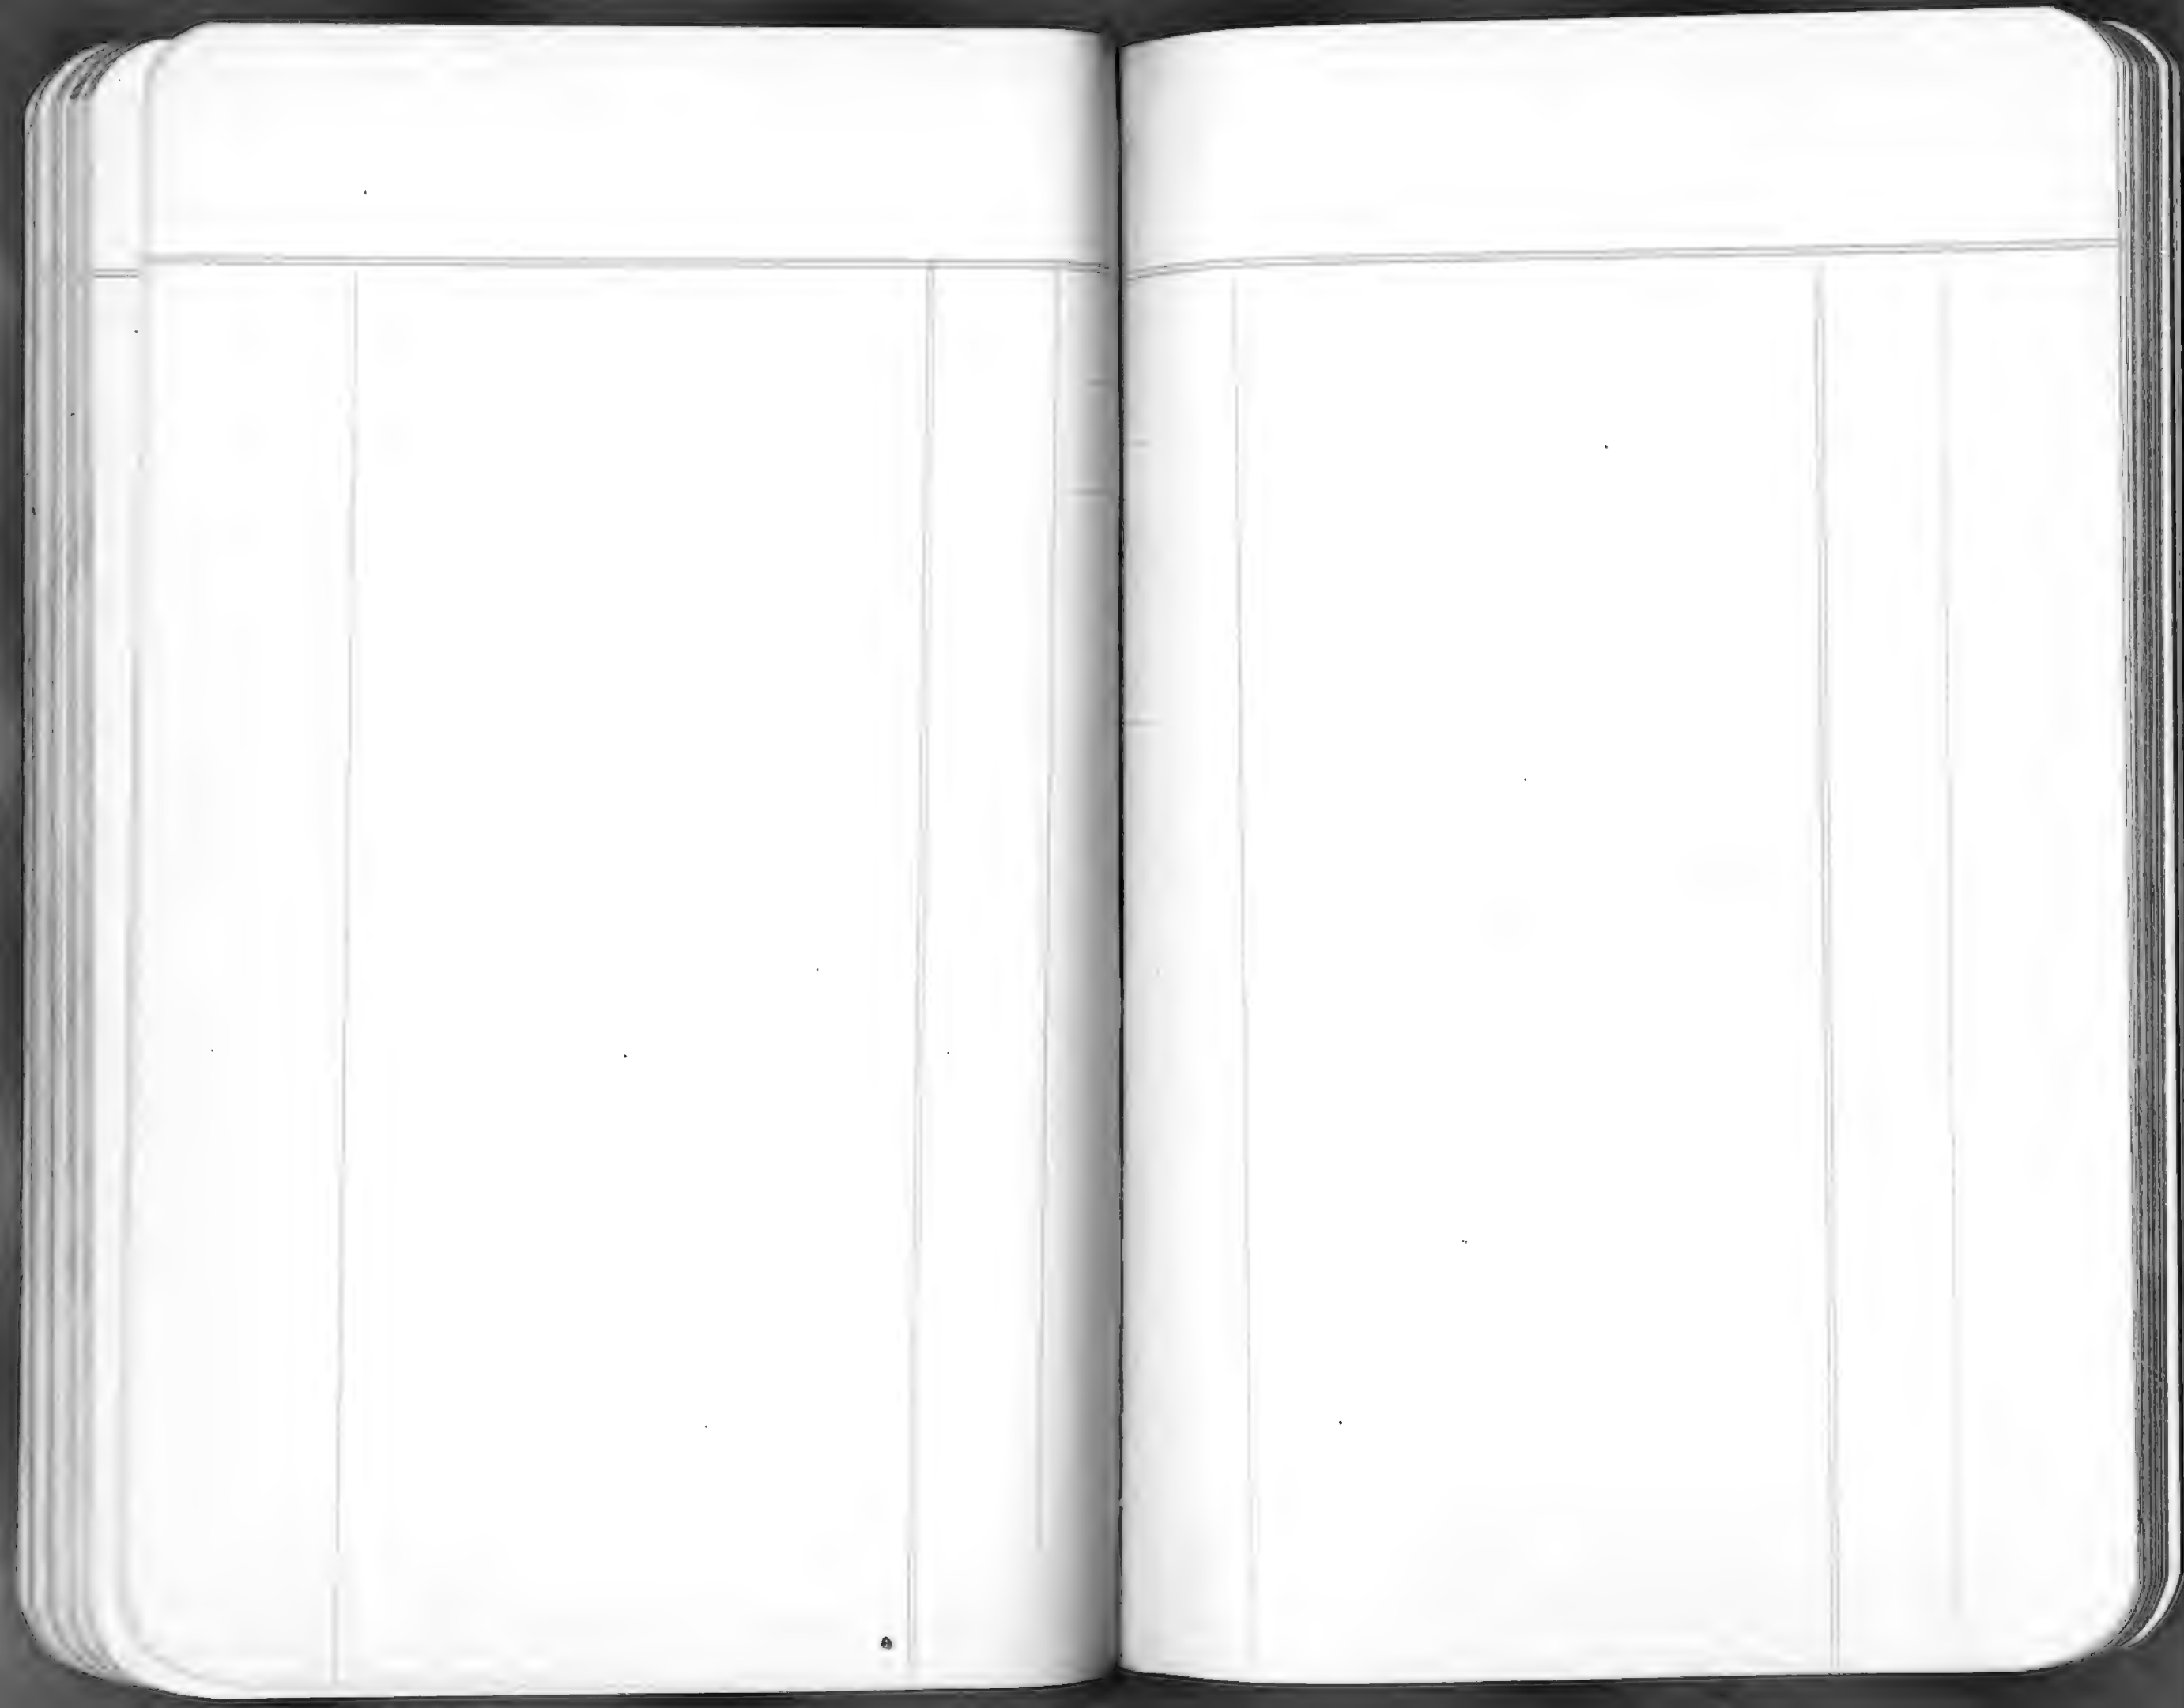

2F2321 ¢ \$.20

GUN SHELL EXTRACTOR

A simple and inexpensive device for extracting shotgun shells that stick in the barrel of your gun. When you order say what gauge you want.

2F2322 ¢ \$.15

Aug 3 left Tucson

Arrived at Summit Canyon Santa

3.40 PM

Aug 15. Collected in

Summit Canyon. Sceloporus albidus

Common beyond found both on
rocks and trees in Canyon bottom

Collected 11 specimens, U. stansburiana albidus
gularis. In the Snake Line

Collected. Sceloporus found in Canyon
bottom on shady side among granite

rocks. Small in color found among
granite rocks covered with wild
grape vines and brushy localities.
Gloss green and evidences of plenty
of rain in this range

Aug 15-16-17 Collected in this

Locality

Aug 18 started again morning to
Summit Canyon. Started raining
and did not go out. Took in the

Aug 19 started the rain again
but did not go out. Canyon still

[illegible]

May 18
I had a very good day - but
supposed to be a great one - but
it is now only raining in
and then only a small stream of water
may find a hole in the ground

Q. 12

was to be a very dry, little
green thicket and no important
meadows or open places. Found
S. ferussacii on summit and about
400 ft below. Collected no *S.*
species under a stone. Very little

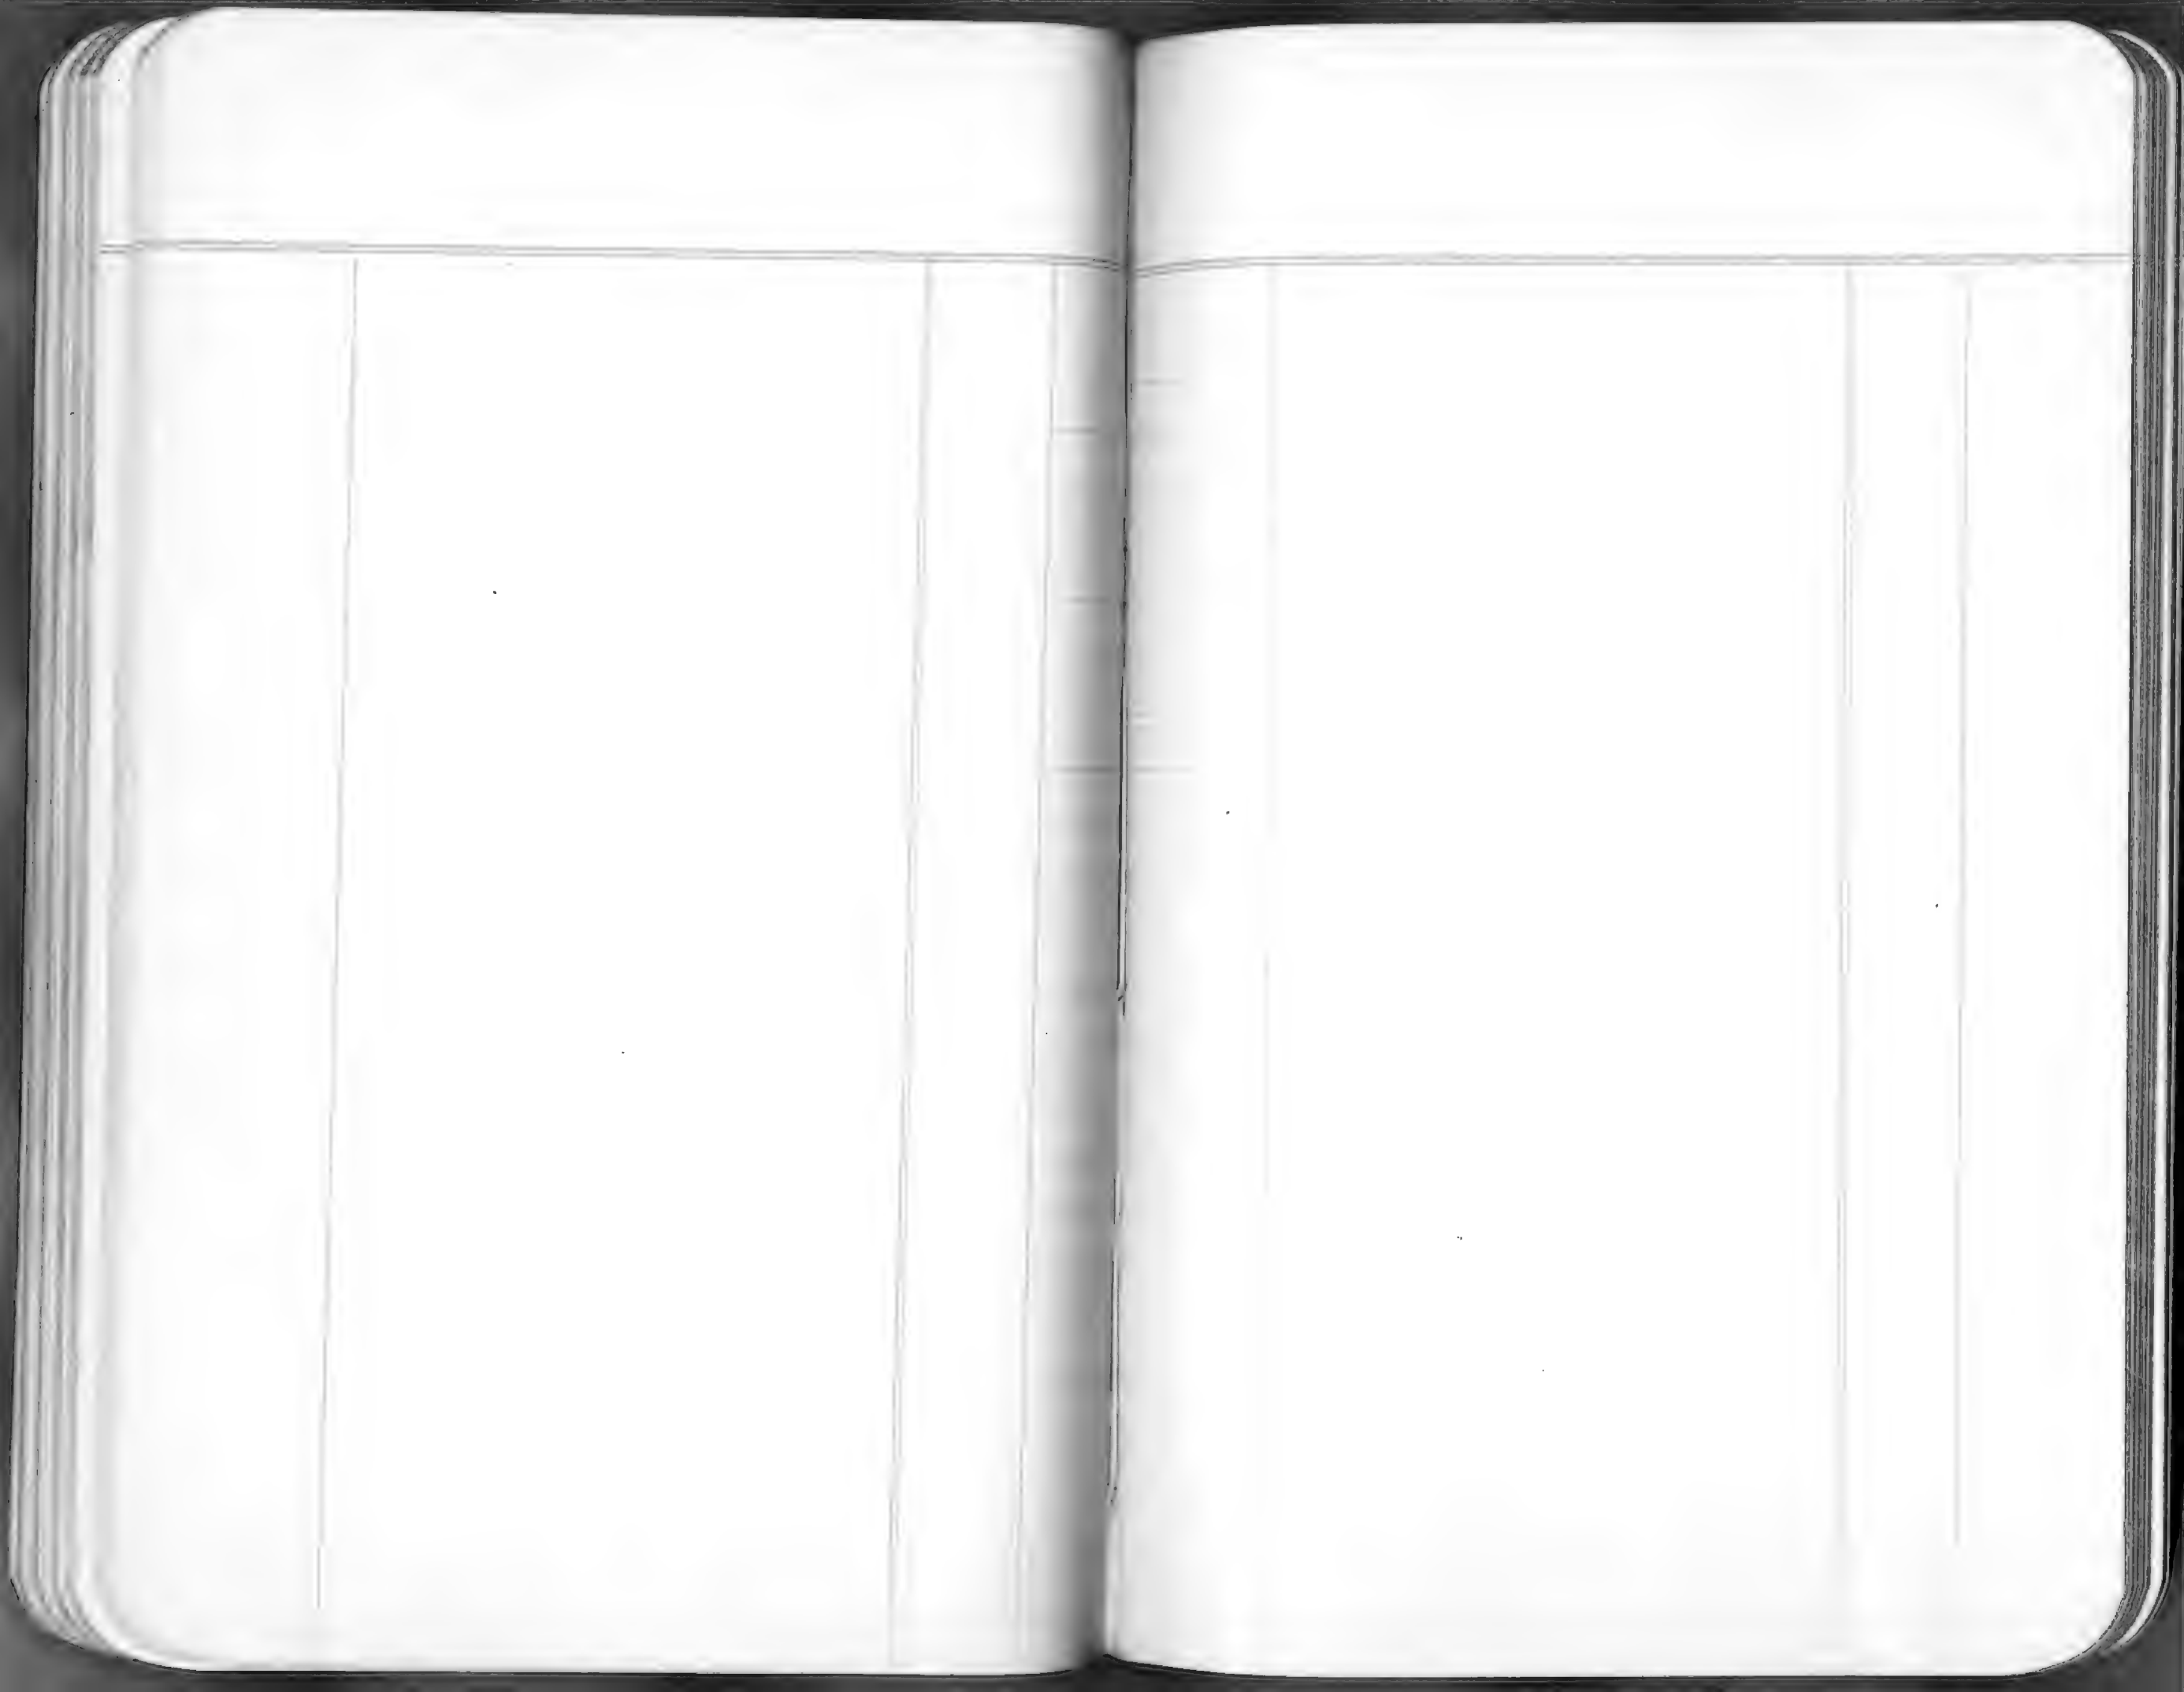

collecting ground. Trail to Summit very steep
and very rough. Thick brush all the
way. Spent 40 min on first peak, still
no route - all there was - list found
nothing.

6/7/72

had dinner at 12.00 south of the
camp. It was very hot all day. Some-
times it rained and then sometimes it
was very hot and collected some birds.
In the evening, I started about 8 P.M. to
the light station.

[illegible]

Aug 30. Went to the Great Caliente Canyon
Camped about 1/2 mile above Spring.
Spring is not good, water is bad
but on road to Spring at
the mouth of the canyon very rocky
and heavily timbered.
Saw some small birds of the canyon all
the way down but did not see
a few of the birds in the canyon.
The birds were small and very
few.

2495 Tail of *Sceloporus jarrovi*
in stomach.

June 10

Worked top of Miller's Peak in
search of *S. jarrovi*. Hunted all
around rocks on summit where
they were reported to be taken
but found only *S. jarrovi* one
chilled - very dark, weather
rather cool and strong breeze.
Hunted for 2 or 3 hours and
returned to a level about 500
ft below summit on the S.W.
slope in a small open grassy
area found the first specimen
of *S. jarrovi*. The grass was dry
and bent over and would have
been about a foot high when
standing. Only two specimens
were found and caught with
the hand by pressing down
the grass on top of them.
Found them to be very quiet
an elusive. All specimens
taken were ♂ and one showed

are most numerous whatever
on both. The other are found
elsewhere.

S. jordanii was found from 5000
ft upwards but not particularly
abundant at the higher elevations.

2477
2478

Two specimens of *Campylomma* both ♂
found in Carr Canyon about 300 ft above
Canyon bottom both under one large flat
stone. One had just shed its skin and
the other just beginning to shed.

C. jordanii was found on both sides
from 200 to 500 ft above the Canyon
bottom and ~~some~~ some of the specimens
collected were found by walking over
the ground. It is abundant around the
rattle. Carr Canyon are the only ones
they were collected in. Their principal
food is probably *S. jordanii*. The only larva
found in these slides.

1211 Taken in oak trees about 15 ft
above ground on outermost
twigs. As a rule *S. jordanii*
is found close to the main trunk
or large limbs. This is the
first spec. noted in this
section.

1212 Found sitting on stone at 7.20
Under oak tree (lower part) of
Carr Canyon

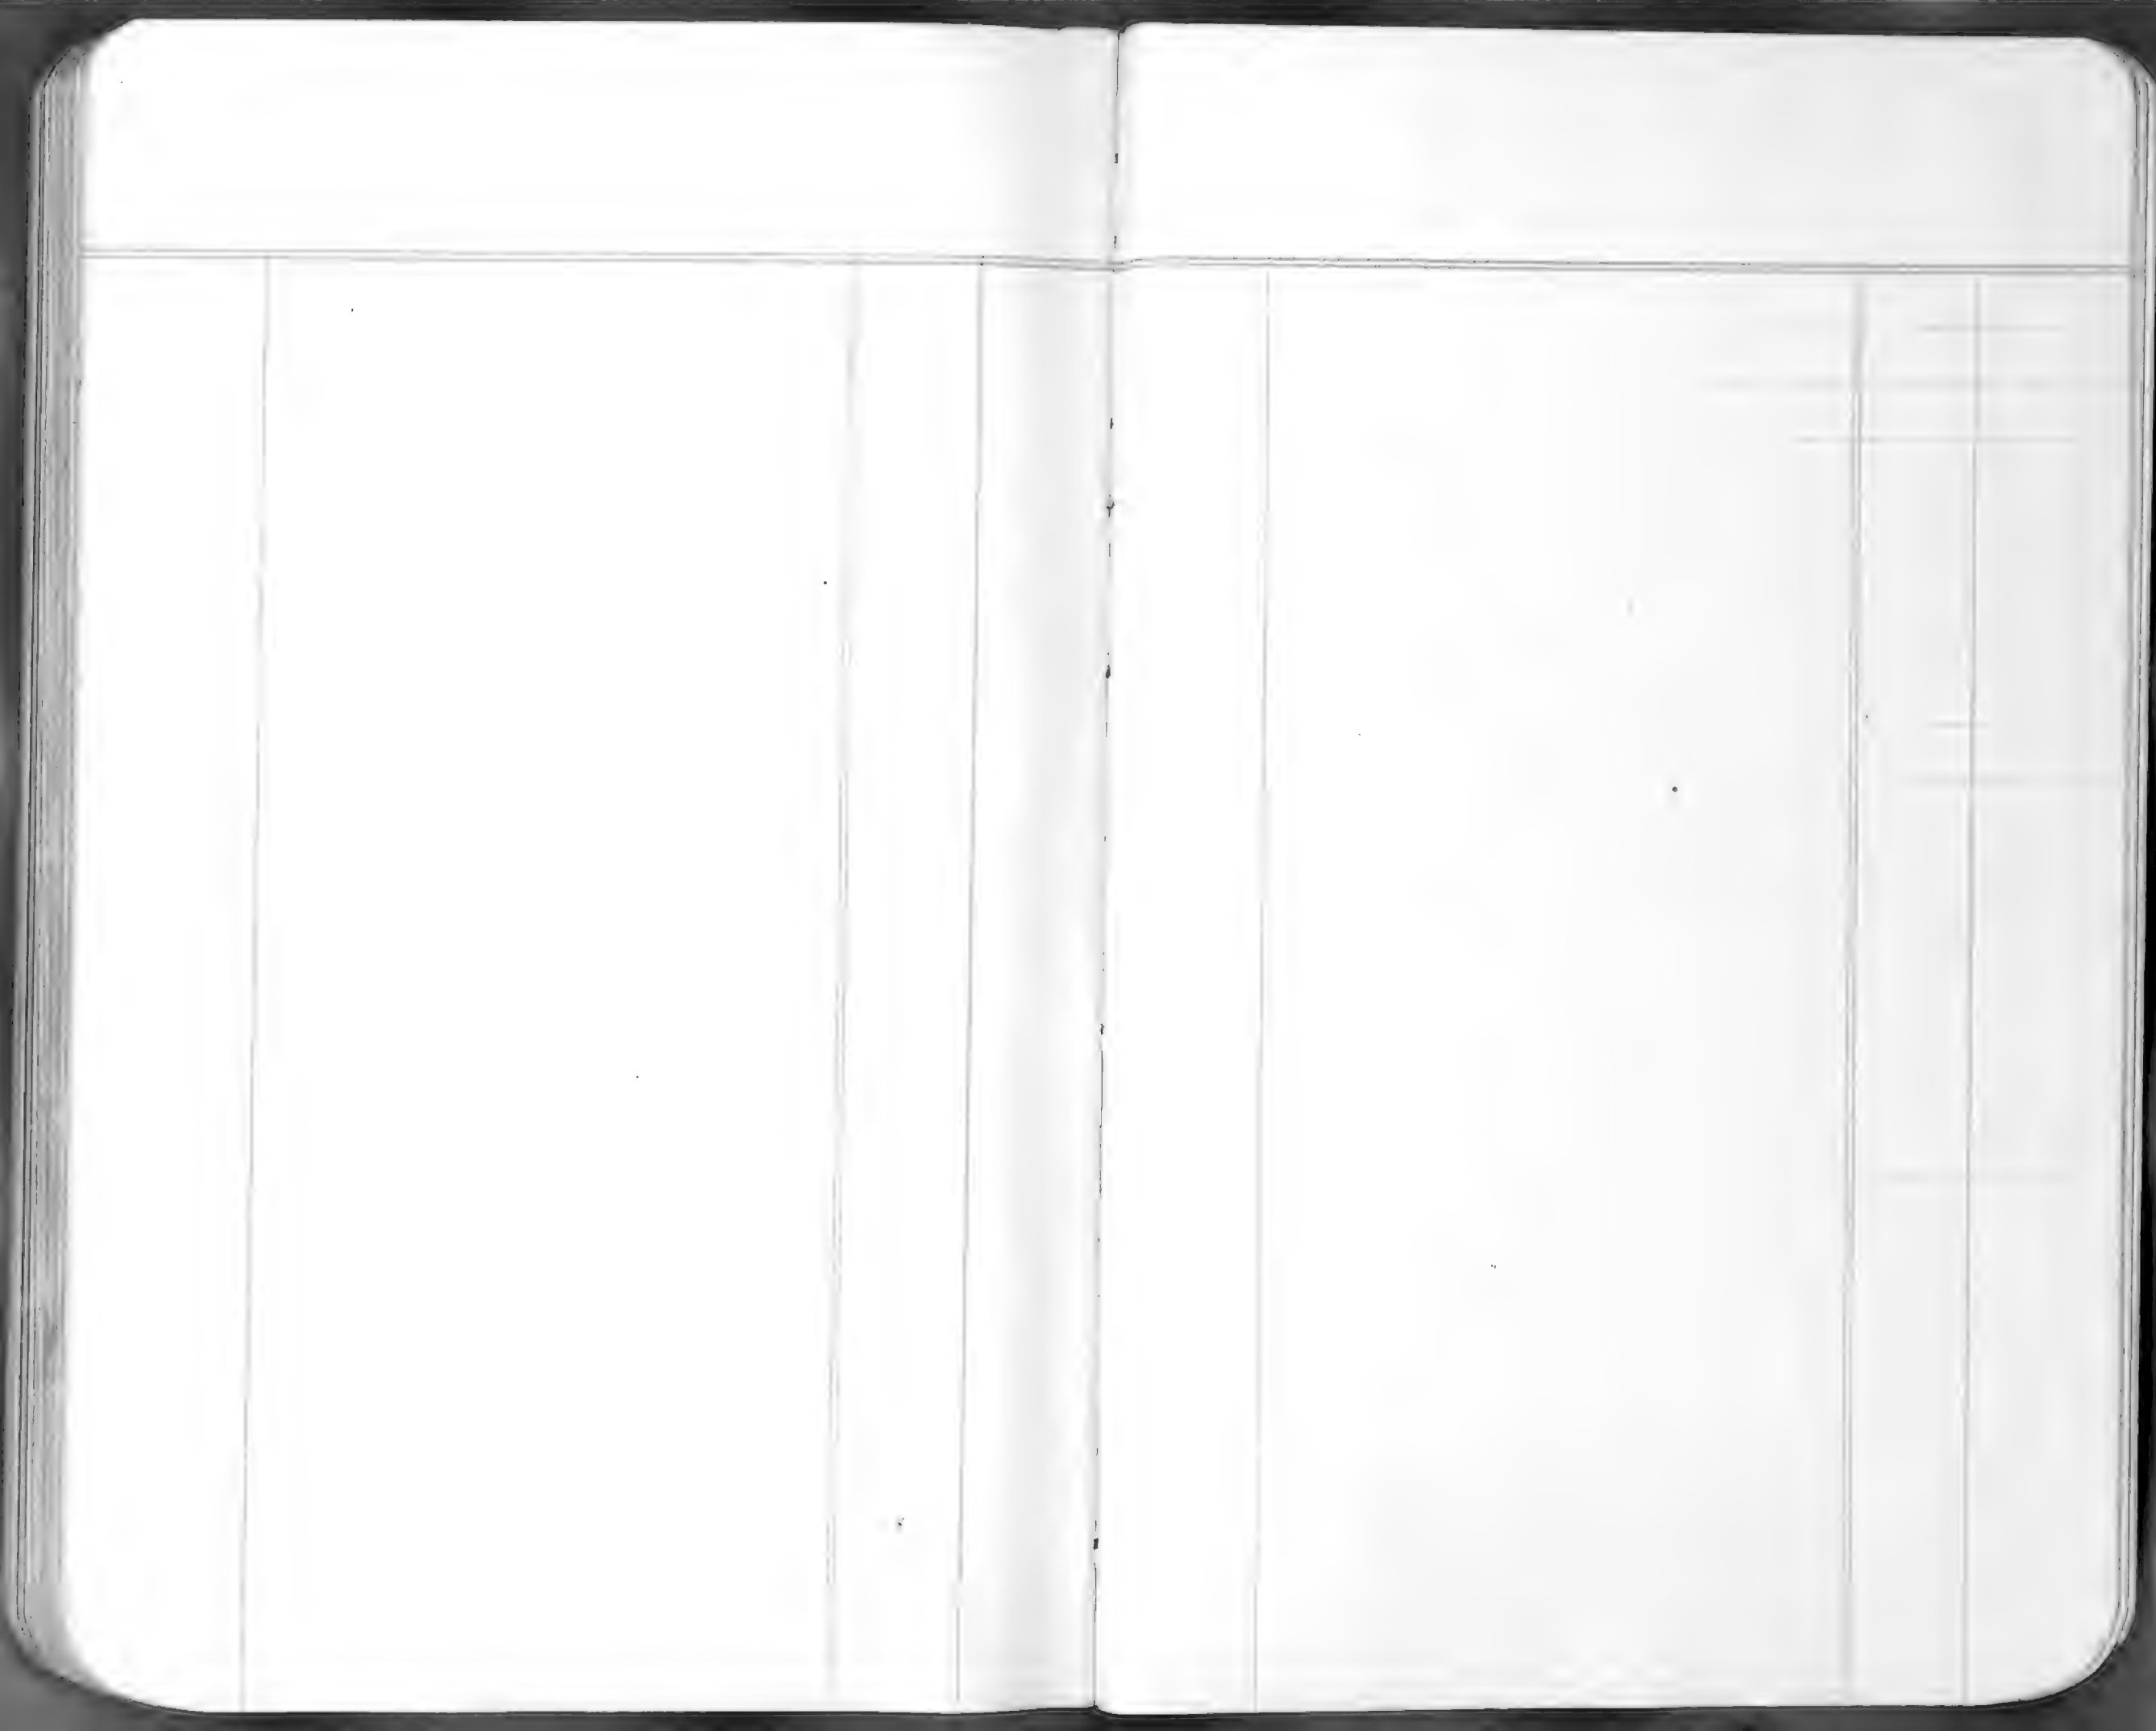

1213 Small animal in trunk

1214 Specimens of *Beetle*, probably some
species of *Elater* and *Staphylinidae*
found in trunk

1215 Found under stone at base of
hill. Large animal in trunk
